

# **CAPABILITIES**

# **Development**

- Wind resource assessment using on-site and off-site data, including MCP models
- Technical studies, including shadow flicker, ice throw, sound, and wake loss
- On-site data collection using LiDAR
- · On-site sound studies
- Terrain-based wind flow modeling
- · Wind resource map development
- Full permitting studies, including planning, zoning, local, state, and federal
- · 3D site modeling
- · Shovel ready feasibility studies
- Detailed turbine production models, including auditable Monte Carlo-based exceedance
- · Financial risk assessment and modeling
- In-house legal for contracting, compliance, and permitting

### **Finance**

- Project finance
- Fleet finance
- Non-recourse debt structures
- Tax equity structures
- Tax equity safe harbor strategies
- Technical due diligence & technical consulting

# **Engineering**

- Interconnection design under IEEE 1547
- Interconnection under PURPA as QF
- Project low-voltage and high-voltage electrical engineering
- · Protection and controls engineering
- SCADA and ICS design compliant with FERC/NERC/NIPP
- Tower internal system design
- Tower design
- · Foundation design
- Civil design
- · Critical lift planning
- Rigging design
- Whole system engineering and optimization
- · Drafting, 2D and 3D

#### **Procurement**

- Turbine procurement
- International shipping management, including imports/exports
- · Tower procurement, including manufacturing oversight
- Tower internal procurement
- BOP equipment and material procurement

#### Construction

- · Site construction, planning, and management
- · Site safety, OSHA 1910, 1926, MSHA Part 46 Surface Mining
- Advanced scheduling / linear scheduling
- Civil construction
- Foundation construction
- Low-voltage electrical construction
- High-voltage electrical construction
- HV electrical equipment installation
- · Heavy rigging and crane operation
- Complete turbine installation

# **Operations**

- Real-time monitoring
- · Monthly performance management and reporting
- · Monthly billing and customer reporting
- BOP warranty and maintenance operations
- Production monitoring and validation
- · Emergency response

#### Other

- · Internal research and development
- Consulting and expert testimony for "special situations" in utility-scale wind projects
- Tower rescue training and advanced rope rescue training
- Accredited Emergency Medical Technician (EMT) training and certification
- Accredited Advanced Emergency Medical Technician (AEMT) training and certification
- Licensed Terminal Distributor of Dangerous Drugs / EMT / AEMT operations
- Wind energy course development for all education levels
