

**JOB TITLE:** Analyst**DATE POSTED:** 2022**COMPANY DESCRIPTION:**

Founded in 2009, One Energy is an industrial power company that is decarbonizing manufacturing, enabling customer control, and building the customer-centric power grid of the future. The company provides physical solutions including Wind for Industry® and ManagedHV™, as well as analytics and commercial offerings to enable end users to fully customize their energy experience. One Energy is a Utility 2.0 company, and is the largest installer and owner of behind-the-meter wind energy in the United States. Learn more at [www.oneenergy.com](http://www.oneenergy.com)

**1 | SUMMARY OF FUNCTIONS:**

The Analyst will be responsible for technical matters related to the development and financing of *Wind for Industry*® projects. There are two career tracks for this position: a finance track (focused on financial modeling) and a science track (focused on data analysis and wind resource). The track will be determined by the qualified candidate's background and experience. This position will be within the Project Planning and Technology department and will also have the opportunity to work with the Research and Development, Finance, and Regulatory departments.

**2 | ROLES AND RESPONSIBILITIES:**

- Complete the development of *Wind for Industry*® projects consistent with One Energy's published methodologies. This includes feasibility studies, initial turbine siting, zoning and permitting analysis, wind resource assessments, energy production estimates, and land acquisition.
- Communicate technical information and create reports for potential customers, the community, and investors.
- Support business development, meet with customers, and maintain One Energy's CRM.
- Build and maintain project and corporate financial models.
- Design, maintain, analyze, and validate on-site data campaigns and other instrumentation data.
- Participate in the research and implementation of new wind resource assessment and project development methods.
- Maintain One Energy's mapping system.

**3 | ORGANIZATIONAL RELATIONSHIPS:**

Reports to the Head of Project Planning and Technology; no immediate supervisory responsibilities

**4 | SKILLS AND REQUIREMENTS:**

- Bachelor's degree in meteorology, engineering, finance, economics, or related field
- Excellent interpersonal communication skills, technical writing skills, work ethic, and ability to work in an entrepreneurial environment
- Patience, persistence, and creative problem-solving abilities in groups as well as independently
- Proficient in Microsoft Excel
- Finance track: Understanding of financial and business principles, and experience with financial modeling
- Science Track: Significant experience in data analysis; experience with ArcGIS, computer programming, instrumentation, or boundary layer meteorology a plus

**REMOTE WORK:**

One Energy hires brilliant and exceptional people, and we expect (and empower) our team members to make good decisions for the company. That is why we have an unlimited vacation policy. That is why we pay top of class. That is why we are consistently named a top workplace by media outlets. We trust our employees. We also hire individuals who want to work in the exciting and collaborative environment of our office. We believe there is no substitute for on-site engagement. If an employee occasionally needs (or wants) to work from home, or Australia, we trust them to evaluate the decision and to act accordingly. If life circumstances shift down the road and you require additional flexibility, we are generally flexible. That said, if you are already counting the days you plan to be at home each week, then One Energy is not the right place for you.
