Visiting the North Findlay Wind Campus

One Energy's headquarters at the North Findlay Wind Campus is situated underneath our 10 nearby wind turbines. Our Green Campus property tours offer an up-close view of these utility-scale turbines and our on-site component yard.

Preparing for Your Visit

Please wear or bring shoes that are appropriate for an outdoor tour. (Our parking lot is paved, however tours follow gravel roads.)

The One Energy Executive Team generally dresses business casual (management typically wears slacks and polos) and the office and construction teams usually wear T-shirts and jeans. We encourage visitors to wear what's appropriate for the weather and operating conditions at the North Findlay Wind Campus.

Driving Directions

For the most direct route to our headquarters, **enter the terms "North Findlay Wind Campus" or "One Energy" into your navigation app.**

Please note: do not enter our address into a navigation app. Doing so will direct you to a nearby private residence. In the map above, you'll notice our building sits directly behind the manufacturing facilities (and wind turbines) for Whirlpool Corporation and Ball Corporation.

Driving on I-75, take exit 161 toward County Road 99 and head east. At the second light, turn left onto North Main Street/County Road 220. At the third light, turn right onto Township Road 215 directly after Whirlpool Corporation. Across the railroad tracks, the entrance to One Energy is on the right, marked with a royal blue North Findlay Wind Campus sign.
